

DOGO

DOGO SANITARY WARE LTD.

2023

Company Profile

DOGO Sanitary Ware Limited Specializing in producing sanitary ware, water save device and household products. who have 10 years experience in this area. The company has created a high level and new technology line of products, as well as find and design a most infallible and appealing bathroom fittings which will achieve any tast . which show you here.

Many of the designs that you will find in our shop, were actually winner from European and North American consumer. the design will keep your kitchen and bathroom in ordering. also will achieve any your tast with more style for option. We assure you of the top quality of our products , they are made from the high quality, healthy and environmental raw material and parts. To be honest, bring a lot of joy and facility to you and your home is the aim of DOGO worker.

Please enjoy our products , and very pleasure deal with any feedback from you when using it. we want to be at your service not only today but in the future as well. this is our goal and thanks to your cooperation .

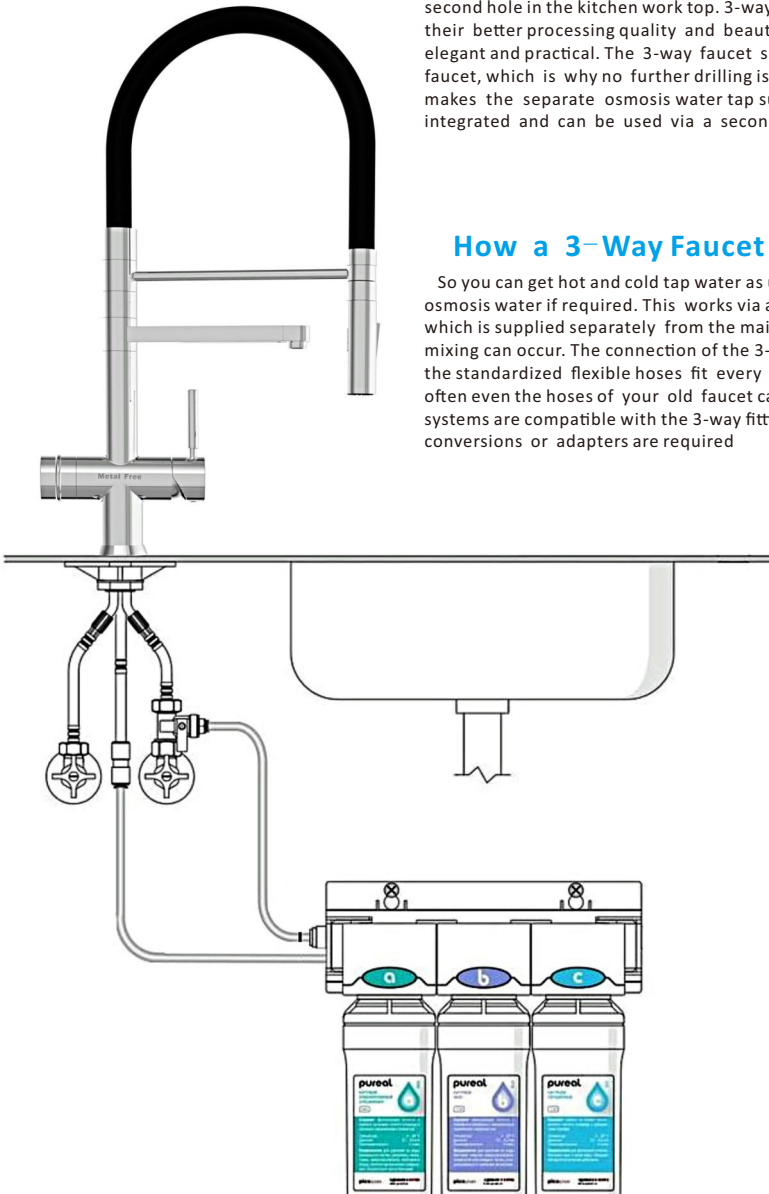

3 Way Faucet

The more optimal solution is of course the 3-way tap. It integrates seamlessly into your kitchen and makes every osmosis system invisible. The biggest advantage of a 3-way tap is that you don't have to drill a second hole in the kitchen work top. 3-way fittings not only impress with their better processing quality and beautiful appearance, they are also elegant and practical. The 3-way faucet simply replaces your previous faucet, which is why no further drilling is required. At the same time, it makes the separate osmosis water tap superfluous, as this is already integrated and can be used via a second lever on the 3-way fitting.

How a 3-Way Faucet Works

So you can get hot and cold tap water as usual, but at the same time tap osmosis water if required. This works via a second water line in the tap, which is supplied separately from the mains water, which means that no mixing can occur. The connection of the 3-way faucet is very easy, since the standardized flexible hoses fit every connection in households and often even the hoses of your old faucet can be used. All of our osmosis systems are compatible with the 3-way fittings, which is why no further conversions or adapters are required.

Specification:

- Low pressure cartridge design
- Spout 360° Swivel
- Filter water through faucet does not touch with metal
- The plastic core are made from NSF Certificated raw material
- Faucet body and outlet chrome surface passed 24Hours salt spray testing.
- Easy to install, just fixed by quick connector
- Installing hole: less than Ø30mm, single hole
- Type: Deck installation
- Size: 296(H)x200(L)x50(L)MM
- Qty. 24Pcs/ Carton

Easy to install

-Lead free Food level NSF
PP Plastic Core and Pipe
